CONTENTS OF VOLUME 22

Number 1, September 1976

Gh. Adam, L. Gr. Ixaru, and A. Corciovei. A First-Order Perturbative Numerical Method for the Solution of the Radial Schrödinger Equation 1

I. M. Bassett, B. R. E. Lederer, and G. C. Vorlicek. A Direct Numerical Approach to Three Nucleon Bound State Problems 34

Robert K. - C. Chan. A Second-Order, Time Integration Scheme for Calculating Stratified Incompressible Flows 74

Richard M. Beam and R. F. Warming. An Implicit Finite-Difference Algorithm for Hyperbolic Systems in Conservation-Law Form 87

C.-M. Chu and Herschel Weil. Integral Equation Method for Scattering and Absorption of Electromagnetic Radiation by Thin Lossy Dielectric Discs 111

Note

L. I. Ponomarev, I. V. Puzynin, and T. P. Puzynina. Continuous Analog of Newton Method for the Calculation of Quasibound States of Hydrogen μ-Molecules 125

Number 2, October 1976

John Gary. The Method of Lines Applied to a Simple Hyperbolic Equation 131

A. T. Filippov, I. V. Puzynin, and Dmitrij P. Malvo. Numerical Methods for Solving Some Singular Boundary Value Problems of Quantum Mechanics and Quantum Field Theory. I 150

André Brahic. Numerical Simulation of a System of Colliding Bodies in a Gravitational Field 171

Tateaki Sasaki. Automatic Generation of Feynman Graphs in QED . . 189

Samuel Y. K. Yee. An Efficient Method for a Finite-Difference Solution of the Poisson Equation on the Surface of a Sphere 215

Atuo Sato and Erik G. Thompson. Finite Element Models for Creeping Convection 229

Charles H. Bennett. Efficient Estimation of Free Energy Differences from Monte Carlo Data 245

Announcement 269

Number 3, November 1976

N. Mankoč-Borštnik and M. V. Mihailović. A Method for the Projection of Angular Momentum 271
J. Steppeler. The Application of the Second and Third Degree Methods . 295
T. R. Koehler and P. A. Lee. Efficient Analysis of Molecular Dynamics Data 319
C. Z. Cheng and Georg Knorr. The Integration of the Vlasov Equation in Configuration Space 330
M. Blakemore, G. A. Evans, and J. Hyslop. Comparison of Some Methods for Evaluating Infinite Range Oscillatory Integrals 352
J. C. Heydweiller and R. F. Sincovec. A Stable Difference Scheme for the Solution of Hyperbolic Equations Using the Method of Lines 377

Notes

D. G. Colombant and J. H. Gardner. Shock Wave Propagation in an Inhomogeneous Medium Using Finite Differences 389
I. Cohen. Slowly Pulsating Axisymmetric Systems in General Relativity 396

Number 4, December 1976

Daniel T. Gillespie. A General Method for Numerically Simulating the Stochastic Time Evolution of Coupled Chemical Reactions 403
W. R. Fimple, B. J. McKenzie, and S. P. White. A Finite-Difference Newton–Raphson Solution of the Multiconfiguration Hartree–Fock Problem. 435
E. Kestemont and J. Van Craen. On the Computation of Correlation Functions in Molecular Dynamics Experiments 451
Charles Quon. Diffusively Induced Boundary Layers in a Tilted Square Cavity: A Numerical Study 459
D. C. L. Lam and R. B. Simpson. Centered Differencing and the Box Scheme for Diffusion Convection Problems 486
Hans Schamel and Klaus Elsässer. The Application of the Spectral Method to Nonlinear Wave Propagation 501
Alexandre Joel Chorin. Random Choice Solution of Hyperbolic Systems 517

Note

Henry Brusset, Dominique Depeyre, Jean-Pierre Petit, and Francois Haffner. On the Convergence of Standard and Damped Least Squares Methods 534

Author Index for Volume 22 543
